Unique selling points Tuillerie collection :

| **Brand new product!**

Revoir Paris is the first supplier who makes 2 cm ceramic patterned tiles, your client can distribute an innovative novelty.

| **Added value**

The backing process takes remarkable longer than the baking process of a standard uni tile or a thinner tile.

The Tuillerie tiles are much more **durable and stronger**.

The specific raw materials (émaux) that are used are from **superior quality**.

This to intensify the colours and the colour fastness. This is necessary for extreme outdoor conditions.

We can't afford us colour deviations in pattern tiles, this would immediately have a negative impact on the entire pattern.

| **Installation certificate**

Revoir Paris can provide a unique installation certificate for installation of the 2 cm collection on carriers.

Super USP for bigger projects!
